

Variations with Hem Stitch

For a Border or Band

Repeat this sequence to secure the top edge of your drawn thread work band also, making sure to collect the same four threads together to form the ladder effect.

Variation: Serpentine Stitch—complete a row of hemstitch, making bundles of an even number of threads (ie. four). Turn and work hem stitch along the opposite edge, beginning with a half bundle (2). The following bundles are then worked to group half the threads of adjacent bundles together. The last bundle will also be a half bundle.
